DISCUSSION

As written in *Communication* issued by the European Patent Office on the 1 July 2005 in applicant's corresponding Korean Patent Application corresponding to applicant's above-captioned U.S. Patent Application, **Enzo, et al. 'EP051** discloses that the invention concerns DC-polarization devices for radio-frequency transmission systems of high power and low intermodulation, comprising a station (A) originating the RF signal, a station (B) receiving said RF signal from A, and a source D of direct current DC to be fed to B, and connected in a knot N to the line AB, the branches AN and DN comprising a short circuit stub (STU2) respectively an open circuit stub (STU1). Typically the normalised impedance (Z'_{op}) of stub (STU2) is substantially equal to the normalise admittance (Y_{os}) of stub (STU1), and the distance of the free heads of the near ends of the two stubs is the lowest possible.

The citation of the foregoing references is not intended to constitute an assertion that other or more relevant art does not exist. Accordingly, the Examiner is requested to make a wide-ranging and thorough search of the relevant art.

Pursuant to 37 C.F.R. §1.97(c)(2), the fee set forth under 37 C.F.R. §1.17(p) of \$180.00 accompanies this Information Disclosure Statement. Should the check become lost, be deficient in payment, or should other fees be incurred, the Commissioner is authorized to charge Deposit Account No. 02-4943 of Applicant's undersigned attorney in the amount of such fees.

Respectfully submitted,

Robert E. Bushnell
